

# DAVID OBONYANO

## Full-Stack Engineer

✉ davidobonyano@gmail.com    ☎ +234 903 552 6146    📍 Lagos, Nigeria    🔗 david-obonyano.vercel.app

### SUMMARY

Full-Stack Engineer focused on building scalable web applications with React, Next.js, TypeScript, Node.js, and PostgreSQL. Experienced in developing real-time systems, high-performance frontend interfaces, and backend architectures for e-commerce, EdTech, and analytics platforms. Proven ability to optimize application latency and architect secure, high-traffic infrastructure.

### WORK EXPERIENCE

**EasyFlexStores (E-commerce)** – *Frontend Engineer* Mar 2025 – Present

- **Led the frontend architectural transition** to a modular **Next.js** and **React** platform.
- **Optimized checkout flows and state management**, reducing client-side latency by **30%** and checkout abandonment by **18%**.
- **Built high-performance product galleries** and complex filtering systems to improve product discovery and user shopping experience.

**Yano Schools** – *Full-Stack Developer* Aug 2024 – Feb 2025

- **Architected a secure EdTech ecosystem** serving **500+ daily active users** with RBAC authentication and data integrity controls.
- **Engineered automated grading systems** using **PostgreSQL** triggers and advanced backend workflows.
- **Developed scalable modules** across the full stack for student management and examination systems.

**BetOracle** – *Full-Stack Developer* Nov 2023 – Jul 2024

- **Built a real-time sports data ingestion platform** in **Go (Golang)** capable of processing high-frequency API streams.
- **Developed a full-stack Odds Tracker feature** delivering **sub-200ms** real-time data updates via **WebSockets**.
- **Architected PostgreSQL and Redis** caching layers to efficiently handle rapid, concurrent market updates.

**WebFlow Studio** – *Frontend Developer* Feb 2023 – Oct 2023

- **Developed and maintained responsive frontend interfaces** for high-traffic digital utility platforms.
- **Improved Lighthouse performance scores by 30%** through code splitting, asset lazy-loading, and frontend optimization techniques.
- **Collaborated closely with backend engineers** and QA teams to improve release reliability and API integration.

**NSDC (Nigeria Sugar Council)** – *Frontend Developer* Jun 2022 – Jan 2023

- **Modernized legacy government portal interfaces**, resolving deep cross-browser UI and responsiveness issues.
- **Maintained internal pricing tools** using **PHP** and **MySQL** while significantly improving platform accessibility and stability.

### TECHNICAL SKILLS

|                     |                                                              |
|---------------------|--------------------------------------------------------------|
| Languages           | TypeScript, JavaScript, Go (Golang), PHP, SQL, HTML, CSS     |
| Frontend            | React, Next.js, Tailwind CSS, Redux, GSAP, Framer Motion     |
| Backend & Databases | Node.js, FastAPI, Express, PostgreSQL, Redis, MongoDB, MySQL |
| Architecture        | WebSockets, RBAC Systems, Real-Time Applications, REST APIs  |
| Tools & Testing     | Docker, CI/CD, Git, Playwright, Jest, Postman                |

## SELECTED PROJECTS

---

### **CareerPilot** – *React, TypeScript, Local-first architecture*

- Developed a high-performance job tracking and career management platform utilizing a local-first architecture for offline-first capabilities.

### **FeedMe** – *Next.js, React, Tailwind CSS*

- Built a highly responsive food delivery platform featuring micro-interactions, robust performance optimizations, and gamified user experiences.

### **LogiStream SaaS** – *Go, WebSockets, PostgreSQL*

- Engineered a real-time logistics monitoring platform with a Go backend infrastructure optimized for high-frequency GPS data ingestion.

### **FixFinder Verification System** – *TensorFlow.js, Express, MongoDB*

- Architected a secure biometric identity verification platform leveraging client-side machine learning and scalable backend processing.

## EDUCATION

---

### **Federal University of Petroleum Resources (FUPRE)**

Graduated 2024

*B.Sc. in Geology*
