Lagos, Nigeria

SUMMARY

Product-driven **Senior Full-Stack Engineer** with 4+ years of experience architecting end-to-end web solutions, with a proficiency in building real-time data streaming architectures (WebSockets), high-performance APIs, and cinematic user interfaces. I bridge the gap between robust backend systems and fluid frontend experiences to drive core business metrics.

PROFESSIONAL EXPERIENCE

Frontend Developer Jan 2025 — Present
EasyFlexStores (Household Items E-commerce)

- Leading the frontend architectural transition to a modular **Next.js & React** platform.
- Optimized checkout UI and state handling, reducing client-side latency by **30%** and abandonment by **18%**.
- Implemented high-performance product galleries and filtering systems for household items to improve overall shopping experience.

Full-Stack Developer Jan 2024 — Dec 2024
Yano Schools

- Architected a secure EdTech ecosystem handling **500+ daily active users** with a focus on data integrity and RBAC security.
- Engineered the automated grading backend using **PostgreSQL** triggers and customized stored procedures.

Full-Stack Developer Jan 2024 — Dec 2024
BetOracle (Defunct)

EXPERTISE

Languages

- Go (Golang) Python
JavaScript (ES6+) TypeScript SQL

Full-Stack Architecture

- Next.js 15 React 18 Node.js
FastAPI PostgreSQL

Infrastructure & UX

- Redis / Socket.io Docker / CI-CD
Tailwind / GSAP Framer Motion

Testing

- Jest Playwright Go Testing

EDUCATION

B.Sc. Geology

Federal University of Petroleum Resources (FUPRE)
Graduated 2024

PROFESSIONAL TRAINING

Scalable Backend Engineering

- Engineered a real-time data ingestion portal using **Go (Golang)** to process sports data from multiple high-frequency APIs.
- Designed and implemented the full-stack "Odds Tracker" feature, maintaining **sub-200ms end-to-end latency** via WebSockets.
- Architected the Postgres database schema and caching layer (Redis) to support rapid concurrent market updates.

Advanced patterns in Go/Python for high-concurrency systems.

Frontend Developer

Jan 2023 — Dec 2023

WebFlow Studio

- Developed and maintained the frontend of the Ibrlink platform, delivering a responsive and user-friendly interface for digital utility services.
- Optimized application performance through code refactoring and asset optimization, reducing page load time by **20%** and increasing Lighthouse performance scores by **30%**.
- Partnered with backend engineers and QA teams to ensure seamless API integration, reliability, and high-quality releases.

Frontend Developer

May 2022 — Dec 2022

NSDC (Nigeria Sugar Council)

- Modernized the official government portal, resolving significant cross-browser legacy UI issues and enhancing accessibility.
- Maintained internal pricing data tools using PHP and MySQL, ensuring document security and data accuracy.

Junior Frontend Developer

Sep 2021 — Dec 2021

TechNova Solutions

- Developed and maintained 8 corporate websites, delivering 5 new web pages that enhanced user experience and improved client digital presence.
- Translated UI/UX wireframes into responsive, mobile-first interfaces, ensuring cross-browser compatibility and improved usability across devices.
- Collaborated within an Agile team to support testing, peer programming, and iterative feature improvements, contributing to higher code quality.

TECHNICAL PROJECTS

FeedMe (Food Delivery Platform) ↗

NEXT.JS 14 · REACT · TAILWIND CSS

Led the frontend development of a responsive e-commerce application. Engineered performance optimizations including code splitting and advanced image optimization to improve Lighthouse scores by 20%. Designed and implemented interactive gamification features, including a dynamic "Spin the Wheel" system.

LogiStream SaaS (Logistic Dashboard)

GO · REDIS · NEXT.JS · MAPBOX GL

A real-time logistics monitoring platform tracks asset locations with sub-second latency. Implemented a Go-based backend for high-frequency GPS coordinate ingestions across 50+ vehicles.

BetOracle Predictive Engine

PYTHON · FASTAPI · REACT · D3.JS

Full-stack engine for win-probability analytics. Handled data modeling in Python/FastAPI and real-time visualization Core using optimized React and market graphs.

FixFinder Verification System

TENSORFLOW.JS · EXPRESS · MONGODB

Full-stack identity verification system. Built a biometric processing layer with Face API to authenticate providers, reducing alpha identity fraud by 95%.
